EXPERIENCE

OneMain Financial

09.2021 - PRESENT

Product Designer

- Led OneMain’s first digital collections experience from concept through launch, turning complex servicing rules into clear tools that helped customers manage their accounts online.
- Designed payment and financial health experiences that helped drive a 1,050% increase in monthly traffic.
- Increased successful Plaid account connections from 60% to 75% by identifying and removing key points of friction.
- Designed and launched a debt settlement agent portal that helped agents manage accounts three to five times faster, improve debt recovery, and reduce net credit loss.
- Led OneAdvisor, OneMain’s first AI product, from research through companywide launch to more than 9,000 team members. Directed user research, prompt and interaction design, AI prototyping, engineering collaboration, testing, and design QA.

Freelancer

02.2018 - 09.2021

Product Designer

Designed responsive web and mobile experiences for clients across automotive, education, editorial, and data visualization, including Toyota E+, Blink Magazine, Kmind, and Tempy. Worked part time while completing my master’s degree.

iHealth Labs

04.2017 - 01.2018

UX Designer

Designed mobile and connected hardware experiences for the iHealth Blood Pressure Monitor, iHealth Thermometer, and WYZE Camera. Used findings from 300+ contextual interviews and 80+ usability tests to guide product improvements. WYZE Camera reached more than 2 million users.

Yodo1 Games

02.2014 - 08.2014

UX Design Intern

Collaborated with senior designers on the Chinese market experience for the mobile game Cut the Rope.

PROFILE

Product designer simplifying complex financial, healthcare, connected-device, and employee workflows. Combines AI-enabled product design to lead work from discovery through launch and turn ambiguity into clear, accessible experiences.

EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY · 2021

M.S. Analytics

Data analysis, machine learning, visualization, and business analytics

MISSISSIPPI STATE UNIVERSITY · 2016

M.S. Sustainable Bioproducts

Conducted human factors research on ergonomics, posture, comfort, and workplace efficiency. Designed experiments, presented findings to industry partners, and contributed to academic publications.

NANJING FORESTRY UNIVERSITY · 2014

B.S.E. Industrial Design

SKILLS

AI PRODUCT DESIGN

AI interaction design, human-AI collaboration, knowledge assistants, rapid prototyping, interface implementation, and output evaluation.

BUILD + TOOLS

Functional prototyping, interface implementation, testing, and deployment · Figma, Codex, Claude, Cursor, HTML, CSS, JavaScript, Python, R

PRODUCT DESIGN

Product strategy, new product development, complex workflows, interaction design, visual design, responsive design, prototyping, accessibility, design systems

RESEARCH + ANALYTICS

Contextual inquiry, usability testing, workflow mapping, synthesis, data analysis, experiments, design quality review
