
XIAOLING (MIA) ZHOU

SENIOR PRODUCT DESIGNER

xznew2016@gmail.com • 662-370-9075 • xzhou.info • LinkedIn • Open to U.S. remote roles

PROFILE

Senior Product Designer with 8+ years of experience simplifying complex financial, healthcare, connected-device, and employee workflows. Combines human-centered design, research, analytics, and AI-enabled product design to lead 0-to-1 work from discovery through launch and turn ambiguity into clear, accessible experiences.

EXPERIENCE

OneMain Financial | UX Designer

September 2021-Present

- Led the 0-to-1 design of a digital collections experience, translating complex servicing needs into clear self-service customer workflows and aligning cross-functional partners from concept through delivery.
- Designed digital payment experiences, a financial-health tool, and a loan calculator that made critical account tasks and borrowing options easier to understand.
- Delivered two end-to-end experiences for OneMain team members, spanning problem discovery, workflow mapping, prototyping, validation, and implementation.
- Designed OneAdvisor, an AI-enabled tool for team members, translating complex service workflows into a more guided digital experience and shaping the product from concept through product design.
- Improved the Plaid account-connection journey by identifying friction and refining the end-to-end experience, increasing successful connections and enabling more applicants to continue loan applications.

Independent / Freelance | UX Designer

January 2018-August 2021

- Designed responsive campaign experiences for the Toyota E+ launch across mobile and web.
- Researched and improved Tempy, a weather-data visualization experience; also delivered education and editorial work for Blink Magazine and Kmind.

iHealth Labs | UX Designer

April 2017-January 2018

- Designed and launched experiences for connected health and smart-home products, including the iHealth Blood Pressure Monitor, WYZE Camera, and iHealth Thermometer.
- Conducted 300+ contextual interviews plus 80+ in-person and remote usability tests; translated behavioral and usage data into redesigned flows and interfaces.
- Produced 10 prototype iterations for WYZE Camera, which reached 2M+ users; supported 15+ hardware/software iterations for the iHealth Thermometer and designed its Lite App.

Mississippi State University | Human Factors Researcher

October 2014-December 2016

- Designed experiments and analyzed statistical data on ergonomics, posture, muscle activation, comfort, and workplace efficiency; presented findings to industry partners and contributed to academic publications.

Yodo1 Games | UX Design Intern

February 2014-August 2014

- Collaborated with senior designers on the Chinese-market experience for the mobile game Cut the Rope.

EDUCATION

Georgia Institute of Technology | M.S. Analytics, 2021 • Mississippi State University | M.S. Sustainable Bioproducts, Minor in Statistics, 2016
Nanjing Forestry University | B.S.E. Industrial Design, 2014

CAPABILITIES

Product design: Product strategy, 0-to-1 product development, interaction design, visual design, responsive design, prototyping, design systems, accessibility

Research and analytics: User research, usability testing, workflow mapping, data analysis, experimentation, research synthesis

AI and complex systems: AI-enabled product design, financial-service workflows, employee tools, data-connected experiences, rapid concept validation

Tools: Figma, Adobe Creative Suite, Sketch, Axure, Adobe XD, Principle, HTML, CSS, JavaScript, Python, R

RECOGNITION

iF Design Award - Concept Design Award / Top 135 (2013) • International Design Award - Top 40 (2013)
